FAQ

# FAQ

Q: How do I know that the provided data is accurate?

A: That's the neat part. You don't! Just kidding! :) I get this data from the World Bank database, so it is as accurate as they are. Also, keep in mind that it takes some time to calculate and update the data, so for the first couple of months of any given year, the data is probably from the year before previous. This is not something I can impact.

Q: Why did you put a quiz about X, but not Y?

A: Currently, this website is a simple project maintained by [one person](#), so the amount of content is limited accordingly.
